

CEEA-ACÉG Lifetime Service Award

NOMINATION DEADLINE: APRIL 15

This award recognizes those individuals who have, over the span of at least 15 years, contributed significantly to the development of engineering education in Canada, and have been significantly committed to CEEA-ACÉG. This award will only be granted when the Nominations and Awards Committee (NAC) and the CEEA-ACÉG Board believe that a worthy candidate has been nominated (i.e., the award may not be granted every year).

Eligibility criteria:

- Individuals who have played an active role (including significant leadership) in engineering education in Canada over at least 15 years, including time spent committed to CEEA-ACÉG

Selection criteria:

The Board will render its decision based on the nominee's:

- Length of service in engineering education in Canada
- Cumulative length of service to CEEA-ACÉG
- Impact of service on engineering education in Canada
- Impact of service on CEEA-ACÉG
- The comparability of service relative to previous award winners

Award:

When granted, one award per year shall be given at the CEEA-ACÉG Annual Conference Banquet, signified by an engraved plaque (CEEA-ACÉG Emeritus status), waived conference registration fees for the year the award is given, and lifetime CEEA-ACÉG membership, conference travel stipend of up to \$500 (if needed, with receipts); recognition on the CEEA-ACÉG website. The recipient will be invited to give a conference talk at the CEEA-ACÉG Annual Conference Banquet in the same year the award is given.

***Recommendations for names due to CEEA-ACÉG by email by April 15 of each year.**

Email: administrator@ceea-aceg.ca

Championing the field of engineering education through innovation and research is both important and courageous. It is important because it is critical to the development of the profession; and it's courageous because in Canada, the field is still nascent. Innovation and research in engineering education are the agents of change. Innovation in the classroom and dedication to research in a fledgling field at the beginning of an academic career will grow the field of engineering education in Canada; people on this frontier need to be supported and celebrated.

Process of Selection:

- The NAC will seek out a yearly nominee and develop a nomination, as they see fit
- NAC will prepare a file to support each nomination
- NAC will make a recommendation to the CEEA-ACÉG Board
- The Board will render a final decision based on the nominee's file and the NAC's recommendation
- Nominees whose applications are rejected can be nominated again in future years
